Como fazer

• Cada página tem uma grade de figuras grandes. Todas são iguais, menos uma.

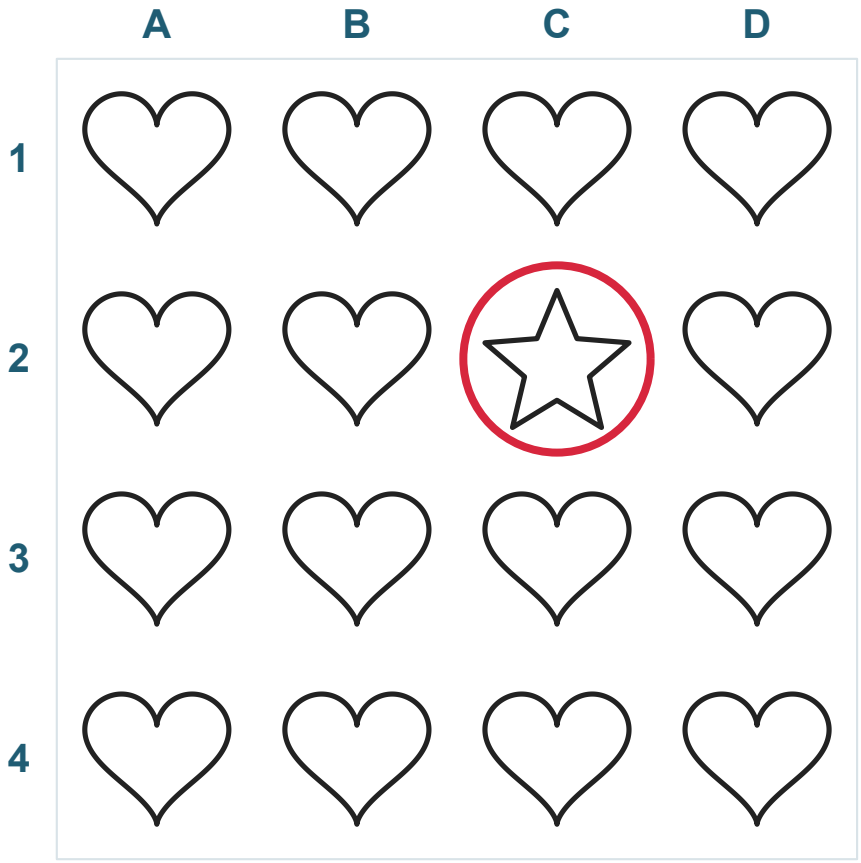

• Olhe com calma, fileira por fileira, encontre a figura diferente e circule.

• Se quiser, anote a coluna (letra de cima) e a linha (número da esquerda) para conferir nas respostas.

• Fica mais desafiador aos poucos: 1 a 15 fáceis (é outra figura), 16 a 30 médias (figura parecida, virada ou espelhada) e 31 a 40 difíceis (um pouco girada, espelhada ou menor).

• As respostas estão no fim. Imprima em A4, em tamanho real, quantas vezes quiser.

Exemplo (resposta C2 circulada):
